

One of my first mentors!

Friday, January 18th, 13

Dear Paul,

I thank you for dropping in at Hockays town Antiques during my book signing event. It was great to see you and renew our old friend-ship. I have privately admired all your accomplishments and know how much better our profession is because of them.

The status in medicine you have chosen (pediatric obesity) is one of the most difficult and most important in medicine today. You are a wonderful role model for our budding Osteopathic students. Having been a participant in the growth of our profession over the past 1/2 century +, all of us take pride in what you individually and our profession collectively have accomplished.

Stay well and continue your professional achievements, your authorships & dignity you give the Osteopathic profession.

Kindest regards

J. Finley D.D.
